FISAP Header and Trailer Record Layouts Description

Each file transmitted from the school to ED and each file received and imported into the school's local system from ED will have a Header Record as the first record of the file.

The last record of each file will be the Trailer Record. The appropriate data records will appear between the Header and Trailer Records.

Servicers and schools reporting FISAP data for multiple schools may send and receive multiple sets of data in a single file: for example,

School A Header Record

School A Data Records

School A Trailer Record

School B Header Record

School B Trailer Record
